## ЭЛЕКТРОПРИВОДЫ

Технические характеристики на

НОН 674

# HON 674

HON 674 is an actuator system for direct-acting safety shut-off valves. According to DIN EN 14382, actuator systems are an integral part of SSVs.

## Overview

### Features and Benefits:

Function Class A (B)

Easy operation and maintenance

Suitable for non-aggressive gases, other gases on enquiry

CE registration according to PED in combination with HON gas pressure regulators

According to DIN EN 14382, the pilot is an integral component of this device. Max.

admissible pressure PS: 25 bar

Max. operating pressure pmax: up to 25 bar

Setting range

## 1. General

The technical specifications, description, and dimensions for the control device **HON 674** are contained in the control device information publications, e.g. 330.00.

The HON publication "**General operating instructions for gas pressure regulators and safety devices**" gives information on installation, commissioning, and notices on fault finding.

For planning through to maintenance of gas pressure regulating systems the applicable national regulations must be observed:

**Germany:** DVGW work sheets G 600, G 459/II, G 490/I, G 491, and G 495

The time intervals for monitoring and maintenance depend largely on the operating conditions and the type of gas media used. Therefore, no fixed intervals are being stated. It is recommended to keep to the maintenance intervals given in the DVGW work sheet G 495.

During maintenance the components must be cleaned and checked carefully. This is still required even if irregularities are found during operation or functional tests. The checks must extend to diaphragms and seals and all moveable parts in particular. Damaged parts must be renewed.

The item numbers given in the special operating and maintenance notices correspond to those in the spare part drawing and spare part list.

It is recommended to keep components marked "**W**" in the spare part drawings and spare part lists in stock for maintenance purposes. These components are summarized on a separate sheet.

These control devices are being used in the following devices with their corresponding operating and maintenance instructions:

<b>device type</b>	<b>Applicable operating and maintenance instruction</b>
HON 330	330.20
HON 332	332.20
HON 402	402.20
HON 408	408.20
